Company Overview:

The goal of Paycom DFW is simply put: to streamline payroll processing. And the company does exactly that, thanks to Jeff York, a former executive with ADP, who started Paycom DFW with the mission to provide a cost-effective, nimble Web-based payroll processing technology with a user interface. The result? Payroll managers sing its praises and CFOs laud the affordable cost. Here's proof that Paycom DFW makes a difference: the company works with more than 5,000 DFW businesses and boasts a near-perfect client retention record of 99 percent. Paycom also offers several ancillary services, including benefit administration and COBRA compliance in a single application.

Year Founded:

1998
