400 S. Record St. Suite 200 Dallas, TX 75202

Company Overview:

As one of the largest technology consulting firms in North Texas, Stravis has provided IT consulting services for local, national and global organizations for over ten years. STRAVIS consultants have in depth experience and expertise in the Audio Visual, Cabling, Security (Texas license), Networking, Telecommunications, and Data Center industries.

With over 500 successful engagements ranging from 700,000 square foot new building designs to large and complex Data Center migrations, the STRAVIS team has mastered its project management process and communications plan. By taking advantage of collaboration tools such as desktop sharing and video conferencing; utilizing STRAVIS time tested communications documents and dashboards; and conducting strategically scheduled workshops, STRAVIS has perfected the ability to minimize on-site meetings without compromising effective decision making.

STRAVIS works closely with customers, industry experts, manufactures, and vendors to develop viable options and recommendations that meet the demands presented by its clients. The STRAVIS consultants are regularly asked to attend vendor summits with key technology leaders to ensure they are updated on the latest industry trends, products and services. STRAVIS maintains memberships with the Society of Communications Technology Consultants International (SCTC), Building Industry Consulting Service International (BICSI), Project Management Institute (PMI), and Advancing Data Center and IT Infrastructure Professionals (AFCOM) which offers STRAVIS with the unique opportunity to collaborate with voice and data consultants throughout the world.

STRAVIS consultant's business education background and hands-on experience gives us the ability to tie viable technology solutions into an organized deliverable that allows executives to make effective decisions.

Year Founded:

2004

Core Services:

- Audiovisual, Cabling and Security
- IT Consulting
- Design
- Procurement (RFP)
- Project Management
- Migration Planning / Implementation

What Makes Us Different:

- Ability to integrate in depth technical knowledge with strong communications skills to develop business driven solutions that can be deployed on time and within budget based on a client/STRAVIS teaming approach. Proven results based on clients moving to STRAVIS from the competition.
- Broad range of IT experience in the areas of network, unified communications, Audio Visual, Cabling, Security and Data Center technologies and migration services. STRAVIS is able to take an enterprise-wide look at technology to address business needs. This experience has been enhanced based on client requests for services outside standard STRAVIS offerings. Proven STRAVIS methodology can be leveraged in many different types of project engagements
- Impressive results at a good value. STRAVIS fees are typically more aggressive than the competition in many of the services STRAVIS provides. From IT design to project management to migration planning, STRAVIS has been recognized as a great value.
